

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	1 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Credit Card Application	Enter Personal Details Upload Required Documents Submit Application
FR-4	Credit Card Prediction	Validate User Input Analyze Applicant Data using Machine Learning Model Display Approval Prediction (Approved/Rejected) Show Prediction Result to User

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should have a simple and user-friendly interface that is easy to navigate
NFR-2	Security	User data and uploaded documents should be securely stored and protected using authentication and encryption.
NFR-3	Reliability	The system should provide accurate prediction results and remain stable during operation.
NFR-4	Performance	The prediction result should be generated within a few seconds after the user submits the application.
NFR-5	Availability	The application should be available to users 24×7 with minimal downtime.
NFR-6	Scalability	The system should support an increasing number of users and applications without affecting performance.
